

Technical drawing of a rectangular plate. The overall dimensions are 2400 (width) and 3000 (height). The plate is divided into a central rectangular area (1600 x 2200) and four corner sections (400 x 400). The coordinate system has origin A at the bottom-left corner of the plate. The horizontal axis is labeled 1 and the vertical axis is labeled 2. The dimensions are indicated by arrows and numbers: 400, 1600, 400 for width and 400, 2200, 400 for height. The central area is defined by dashed lines.

Technical drawing of a rectangular frame structure. The drawing shows a plan view of a frame with dimensions and labels.

- The overall width is 2200, with a central section of 1500 and side sections of 50 each.
- The overall height is 2600, with a central section of 1500 and side sections of 50 each.
- The central section is labeled $200 \times 13 = 2600$ (width) and $200 \times 10 = 2000$ (height).
- The frame is divided into four quadrants by a horizontal line labeled 1 and a vertical line labeled 2.
- The frame is labeled with circled numbers 1, 2, 3, and 4 at the corners.
- The frame is labeled with circled numbers 5 and 6 at the top and bottom edges.

[illegible]

Technical drawing showing the cross-section and plan view of a reinforced concrete slab. The cross-section (left) shows a total thickness of 300 mm, with a top layer of 50 mm, a middle layer of 200 mm, and a bottom layer of 50 mm. The plan view (right) shows a slab width of 200x4 mm. Reinforcement bars are labeled 1 (top and bottom longitudinal bars) and 2 (transverse bars). A note indicates that the bars should be placed according to the perimeter, with a step of the main reinforcement (становить по периметру, с шагом основной арматуры). Dimensions 700, 150, and 50 are also indicated.
